

PRESS RELEASE

FOR IMMEDIATE RELEASE

Best Industrial Clerk in the Region Rendsburg-Eckernförde was trained at shipyard group GERMAN NAVAL YARDS

Shipyard offer various fields of training for future employees

(Kiel, 08.03.2019) "Not knowing what is going to happen during the day – that's shipyard life", Jule Behrens, who was honored on Wednesday, 6th March 2019 in a festive setting of the yard's internal graduation ceremony. She has not only finished her apprenticeship being the best industrial clerk in the region Rendsburg-Eckernförde/Neumünster but was also best apprentice of all trained professions.

It is this variety she was looking for after school which is why she decided for an apprenticeship as Industrial Clerk, "At the end of my time in school I was looking for a various and demanding profession in the economic sector, in which I can also use the English language."

At GERMAN NAVAL YARDS great emphasis is placed on variety in apprenticeship, "Our trainees work in nearly all departments in order to get a good impression into the variety of the yard and the future profession", Carmen Walter, responsible training manager states.

"Yes, sometimes I was thrown in at the deep end", Jule tells, "but in the end this has helped me develop quickly and independently."

And her trainer adds, "It's about this honest and serious interest, the courage to try new things combined with pleasure in working which characterizes Jule and helped her to finish her apprenticeship with excellence."

Today Jule Behrens is working as project assistant in the repair department dealing with customers of all over Germany and worldwide. "I am glad to have this daily variety and the communication with different people. That's what I've been searching for," the industrial clerk says.

The importance of training is growing more and more. "We like to train and thus ensuring our own qualified junior employees, which we will be needing in the future more than ever", states Carmen Walter.

Beneath Jule Behrens six further apprentices finished their training successfully, among which are also industry mechanics and construction mechanics. All of them will be employed on the sites of NOBISKRUG in Rendsburg and the sister shipyard GERMAN NAVAL YARDS in Kiel.

GERMAN NAVAL YARDS KIEL GmbH:

GERMAN NAVAL YARDS KIEL is specialized in the construction and building of large military vessels such as frigates, corvettes and offshore patrol vessels.

Developed from the surface shipbuilding of HDW (Howaldtswerke-Deutsche Werft GmbH), the shipyard faces 180 years of history. It was previously named HDW-Gaarden and has a long military tradition: Ships of all frigate classes developed at GERMAN NAVAL YARDS KIEL, with which the Germany Navy is presently operating. The largest dry dock in the Baltic Sea (426 m of length) and a 900 tons gantry crane are included in its efficient infrastructure.
